

FEATURES

The AU-PS15 is a high-performance speaker designed to deliver powerful and well-balanced sound for live events, DJs, and professional audio setups. Featuring a large 15-inch woofer and a precision high-frequency driver, it produces deep bass, clear mids, and crisp highs, creating an immersive and dynamic audio experience suitable for a wide range of applications.

Built for strength and reliability, the AU-PS15 offers excellent sound projection and wide coverage, making it ideal for medium to large venues. Its durable construction and efficient acoustic design ensure consistent performance, making it a dependable choice for event professionals who need strong, clear, and impactful sound reinforcement.
