

FEATURES

The AU-S-S1500 is a high-performance smoke machine designed to produce dense and consistent fog effects for stages, events, clubs, and live performances. With its powerful output, it enhances lighting effects and creates a dramatic atmosphere, making it perfect for DJs, concerts, and entertainment venues looking to elevate their visual experience.

Easy to operate and highly reliable, the AU-S-S1500 heats up quickly and delivers continuous fog output for smooth and uninterrupted performance. With flexible control options, it integrates easily into different setups, making it an excellent choice for event professionals seeking a strong, efficient, and impactful fog solution.
