

FEATURES

The AU-S-S900 is a powerful and efficient fog machine designed to create dense and atmospheric effects for stages, events, parties, and entertainment venues. With its strong output and consistent performance, it enhances lighting effects and adds depth to any visual setup, making it ideal for DJs, clubs, and live productions.

Built for reliability and ease of use, the AU-S-S900 heats up quickly and delivers continuous fog output for smooth operation during events. Its compact design and practical capacity make it suitable for both small and medium-sized venues, offering a dependable solution for creating immersive and professional atmospheres.
