

FEATURES

The AU-S-SJET is a powerful smoke machine designed to create dense and impactful fog effects for stages, events, parties, and entertainment spaces. With its strong output, it enhances lighting effects and adds depth to any atmosphere, making it ideal for DJs, live shows, and visual productions that require a dynamic environment.

Simple and easy to use, the AU-S-SJET operates with manual control, making it a practical solution for quick setups and straightforward operation. Its compact design and reliable performance make it suitable for a wide range of applications, offering an efficient and effective way to create professional fog effects.
